

# You can't succeed with lemons. Hire with confidence not regret.

Business success almost always comes down to people, teams, culture and leadership. Finding the right people with the right skills and culture is essential, but it's also fraught with risk.

Many organisations fail to properly assess talent, motives, strengths, ethics and reliability as part of the selection process. They recruit people with relevant technical skills and likeable personalities, but often overlook cultural match and crucial characteristics until it's too late.

## DifferenThinking Selection and Analysis

Add greater rigour and objectivity to your recruitment process and be confident you're hiring the right candidate. Led by people and performance expert Dr Zivit Inbar, DifferenThinking's Selection and Analysis gives hiring managers a complete assessment of candidate suitability and assurance around hiring decisions.

“

It is extremely costly when you get the recruitment wrong- it affects other staff members, the culture, the team, and of course the financial costs. Now we have an outstanding team and I attribute a tremendous amount of it to Zivit's work. ”
